Contents of Volume 16

NUMBER 1 JANUARY 1987

Editorial 1

A Modified Theoretical Model for the Efficiency Calculations of a Si(Li) Detector 3
M. L. GARG, J. SINGH, H. R. VERMA AND P. N. TREHAN

Surface and Near-Surface Chemical Characterization by Low-Energy Electron-Induced X-Ray Spectrometry (LEEIXS): A Review 7
M. ROMAND, R. BADOR, M. CHARBONNIER AND F. GAILLARD

Mean Energy of Backscattered Electrons at Various Angles of Incidence 17
M. GABER

Optimization of Geometry for X-Ray Analysis of Rare Earth Materials 23
M. LAL, R. K. CHOUDHURY AND R. M. AGRAWAL

Theoretical Assessment of the Coefficients $\phi(0)$ and γ_0 of the Gaussian ϕ (ρz) Curves 27
J. H. TIRIRA SAA AND J. A. RIVEROS

Effect of Relative L-Line Intensity Ratios on the Accuracy of Standardless X-Ray Microanalysis 33
J. L. LÁBÁR

Quantitative Analysis of Binary Mixtures Using a Simple-X Ray Fluorescence Technique 37
R. MITTAL, K. L. ALLAWADHI AND B. S. SOOD

Calculation of the Influence Coefficients for the Claisse–Quintin Algorithm 41
K. R. WADLEIGH

Precipitation Technique to Prepare Thin-Film Standards of Lead and Zinc for X-Ray Fluorescence Spectrometry 45
T. W. S. PANG, A. M. D'ONOFRIO, F. B. LO, D. K. ARAI AND M. A. NAZAR

NUMBER 2 MARCH 1987

Editorial 53

X-Ray Fluorescence Studies on Low-Z Elements of Straits Chinese Porcelains using Fe-55 and Cd-109 Annular Sources 55
C. T. YAP

SEM Studies on Silica from Plant Materials 57
P. PRASANNA AND M. PATEL

Analysis of Fused Samples Using Influence Coefficients Obtained from Synthetic Standards 61
J. WARD AND J. VALDES

Die Nutzung externer Linien-zu Untergrundverhältnisse in der quantitativen energiedispersiven Elektronenstrahl-Mikroanalyse (Use of External Peak-to-Background Ratios in Quantitative Energy-Dispersive Electron Probe Microanalysis) 67
J. HECKEL AND P. JUGELT

$K\beta_2/K\beta_{1,3}$ X-Ray Intensity Ratios of Arsenic, Selenium and Bromine in Various Chemical States (Chemical State Analyses of As, Se and Br by X-Ray Method. 4) 73
M. IWATSUKI AND T. FUKASAWA

Effect of Some Important Sample Parameters on the X-Ray Fluorescence Determination of Impurities in Pure Materials: Determination of Ca, Y, Gd and Th in Uranium 81
R. M. AGRAWAL AND S. K. KAPOOR

Comparison of Matrix Effect Correction and Direct Intensity–Concentration Relationship Methods for Major Element Analysis of Geological Materials by X-Ray Fluorescence Spectrometry 87
M. GUEVARA AND S. P. VERMA

Comparison of Experimental Relative Efficiencies for Different Si(Li) Detectors in the Energy Range, 4.5–17.5 keV 95
C. T. YAP, P. KUMP, S. M. TANG AND M. G. BILAL

NUMBER 3 MAY 1987

Editorial 101

A Comprehensive Alpha Coefficient Algorithm (a Second Version) 103
R. M. ROUSSEAU

Advances in X-Ray Fluorescence Spectrometry in China 109
M. GUANG-ZU

Application of the Coherent-to-Incoherent Intensity Ratio to the Measurement of Mineral Matter in Coals 113
L. S. DALE AND C. E. MATULIS

X-Ray Fluorescence Determination of Niobium and Tantalum in Geological Materials 123
G. P. BASU CHAUDHURY, C. K. GANGULI AND N. SEN

A Modified Approach to the Quantitative XRF Analysis of Thick Targets 125
I. ORLIĆ, S. TOMIĆ, J. MAKJANIĆ, M. JAKŠIĆ AND V. VALKOVIĆ

Routine Method of X-Ray Spectrometric Analysis without Standards Involving Only Initial Instrumental Calibration: 1—Theory and Derivation of Calculation Equations 131
Y.-Z. WANG AND Z.-M. CHEN

Routine Method of X-Ray Spectrometric Analysis without Standards Involving Only Initial Instrumental Calibration: 2—Practical Calculation Equations for Iteration in an Iron-Based Alloy System Constituted by Ten Elements and their Experimental Determination 137
Y.-Z. WANG AND Z.-M. CHEN

Excited Fluorescence in Low-Z Elements by the Low-Energy Gamma Transitions and L X-Rays from a 241-Am XRF Source 143
V. DELGADO, L. GONZÁLEZ, A. LÓPEZ, P. MORÁN AND E. VAÑÓ

Elemental Analysis of Coal Ash Using Energy-Dispersive X-Ray Fluorescence 147
N. VENKATESWARA RAO, C. V. RAGHAVAIAH, G. SATYANARAYANA AND D. L. SASTRY

NUMBER 4 JULY 1987

Editorial 151

A Comment on the K and L X-Ray Emission Intensities of Some Radionuclides 153
N. P. S. SIDHU AND H. S. SAHOTA

Control of Chemical Composition in Tin–Lead Commercial Alloys by Wavelength-Dispersive X-Ray Spectrometry 157
J. WARD C.

Determination of Metals in Oil Using Total Reflection X-Ray Fluorescence Spectrometry 161
D. B. BILBREY, D. J. LELAND, D. E. LEYDEN, P. WOBRAUSCHEK AND H. AIGINGER

Energy-Dispersive X-Ray Fluorescence Analysis of Massive Sulfides Using Fundamental Influence Coefficients 167
R. G. JOHNSON AND S. L. FLEMING, II

An Approach to the Solution of Matrix Problems in the XRF Analysis of Lead–Zinc Ore by the Use of an Internal Standard and Mathematical Corrections 171
N. S. MAHAPATRA

A New Measurement of the $L\alpha_{1,2}$ X-Ray Emission Spectrum of Zn and the K Emission Bands of Zn and Ga 177
J. A. LEIRO

Description of Low-Energy Peak Distortion Observed in X-Ray Spectrometry with Si(Li) Detectors 181
J. HECKEL AND W. SCHOLZ

L_{III} EXAFS in Holmium 187
B. K. AGARWAL

NUMBER 5 SEPTEMBER 1987

Editorial 193

Analytic Description of Si(Li) Spectral Lineshapes Due to Monoenergetic Photons 195
J. L. CAMPBELL, A. PERUJO AND B. M. MILLMAN

Measurement of K X-Ray Fluorescence Cross-Sections for Some Elements with $23 \leqslant Z \leqslant 55$ in the Energy Range 8–60 keV 203
S. KUMAR, S. SINGH, D. MEHTA, N. SINGH, P. C. MANGAL AND P. N. TREHAN

Elemental Analysis Using Electron Beam-Induced K X-Rays 207
A. PAPE, J. C. SENS AND A. GEORGIADIS

Importance of Sample Grinding Time in X-Ray Emission Spectrometry 211
Vj. NOVOSEL-RADOVIĆ AND Da. MALJKOVIĆ

Optimization of Geometry for Radioisotope Excited X-Ray Fluorescence Spectrometry 217
J. M. F. DOS SANTOS AND C. A. N. CONDE

Determination of Arsenic in Rocks and Ores with a Sequential X-Ray Spectrometer 223
J. WARD

X-Ray Fluorescence Determination of Trace Element Concentrations of Zinc and Arsenic and Their Relation to Ceramic Attribution 229
C. T. YAP

NUMBER 6 NOVEMBER 1987

Editorial 235

Ice Thickness and Low-Energy Si(Li) Detector Efficiency Measurements 237
D. D. COHEN

Assessment of the Gaussian $\phi(\rho z)$ Curves in Quantitative Electron Probe Microanalysis without Optimization of the Parameters 243
J. H. TIRIRA SAÁ, M. A. DEL GIORGIO AND J. A. RIVEROS

Evaluation of the Main Atomic Number, Absorption and Fluorescence Correction Models in Quantitative Microanalysis 249
D. UGARTE, G. CASTELLANO, J. TRINCAVELLI, M. DEL GIORGIO AND J. A. RIVEROS

Problems of Automatic Qualitative X-Ray Fluorescence Analysis: Part One 255
Ju. JORDANOV, Ts. TSANOV, R. STEFANOV AND N. JORDANOV

The Claisse–Quintin and Lachance–Claisse Alpha Correction Algorithms and their Modifications. A Critical Examination 261
R. TERTIAN
